## PROFILE

Fullstack developer with experience in Angular, TypeScript, Python and Django. During my training I completed more than twelve projects, both independently and in teams. In addition, I bring five years of leadership experience as a department manager as well as experience in technical customer support. This means I understand technical challenges as well as customer needs, and I want to bring this knowledge to the development of modern applications.

## SKILLS

**Frontend:** HTML, CSS, SCSS/Sass, JavaScript, TypeScript, Angular, Responsive Design, Accessibility

**Backend:** Python, Django, Django REST Framework, REST APIs, Supabase, Firebase, Linux

**Tools:** Git/GitHub, Figma, Scrum, Kanban, AI-assisted development (Claude)

## PROFESSIONAL TRAINING

11/2025 – 11/2026

**Qualified Fullstack Web Developer**
Developer Akademie, Munich (remote)

One-year training in frontend and backend development at a TÜV-certified web development academy.

**Module 1: Frontend** · 11/2025 – 06/2026 · completed with certificate

- Frontend development with HTML, SCSS, JavaScript, TypeScript and Angular
- UI implementation from Figma designs, databases with Firebase and Supabase
- Teamwork with Git and Scrum

**Module 2: Backend** · 06/2026 – 11/2026

- Backend development with Python, Django and REST APIs
- Databases with SQLite, PostgreSQL and Redis
- Linux, Docker and deployment

## PROJECTS

**DABubble** Angular · TypeScript · SCSS · Supabase

Real-time chat in the style of Slack. Team project, my part: chat interface, login, profiles, search.

**Join** Angular · TypeScript · SCSS · Supabase

Kanban board for teams. Team project, my part: summary dashboard and drag and drop.

**Coderr** Python · Django · Django REST Framework

Freelancer platform with its own REST API for profiles, offers, orders and reviews.

**El Pollo Loco** HTML · CSS · JavaScript

Jump-and-run game in vanilla JavaScript with a custom game loop and collision detection.
